Do you have your My HealtheVet account **Connected** to external accounts? These accounts could include your DS Logon Level 2 or a 3rd party credential. Do you access your My HealtheVet account directly from an external account?

If at any time you decide you no longer want your My HealtheVet account connected to these other sites, you have the option to **Disconnect Accounts**.

Disconnecting your external accounts does not change or delete them. It will only unlink them from My HealtheVet.

**For example:**

If your DS Logon account is connected to your My HealtheVet account, you may access My HealtheVet directly through a link on eBenefits. You do not need to use a separate login.

When you disconnect your DS Logon account from your My HealtheVet account, your accounts will be unlinked. You will no longer be able to access My HealtheVet through eBenefits. You will need to go to the My HealtheVet website to login with your My HealtheVet User ID and Password.

**To Disconnect** your external accounts from your My HealtheVet account:

- Log into your My HealtheVet account
- Select the Personal Information tab
- Select the My Account icon
- Select the *Disconnect Accounts* link
- Follow the steps to disconnect your accounts

**Note:** You can always reconnect external accounts to your My HealtheVet account. To learn more about connecting your accounts, visit **Connecting Accounts:**
